BADU® SwimJet Systems

Speck Pumps is a leading international manufacturer of high-quality pumps and swimjets for residential and commercial applications. Since 1909, the Speck Pumps brand has stood for innovative engineering and superior products.

Speck offers a wide variety of BADU SwimJet System designs which can be installed in any type or size of new or existing pools, even above ground.

A BADU SwimJet System will instantly transform your pool and give you multiple options for aquatic exercise, therapy, massage and just plain fun. Our systems can be used for swimming, jogging, walking in place, massage, boogie boarding and more.

How They Work

BADU SwimJet Systems create a current by pushing water through jet nozzles that are mounted in an underwater housing in the pool wall or in a housing installed over the wall. The jets create an immediate burst of water with an initial flow rate of up to 400 gallons per minute near the pool wall. This pushes the body of water in front of it which in turn creates a current of up to 5,700 gallons per minute measured between 4 and 6 feet from the pool wall, we call this the “sweet spot.”

The jet nozzles can be adjusted to change the depth and width of the current to suit the individual swimmer's needs.

Use this Planning Guide to choose the ideal Speck BADU SwimJet System for you. If you have any questions, be sure to ask your pool builder or call us directly at 800-223-8538.

Benefits to owning a BADU SwimJet System

- **Backyard Exercise**

Aquatic exercise is arguably the best exercise you can do. Gentle and soothing — no stress on joints or bones — swimming has historically been a favored method for staying in shape. Now you can enjoy a gym quality workout in the comfort of your own home. Seamlessly control the degree of workout you want; as you gain strength and speed from swimming, simply adjust the flow.

- **Family Fun**

Great memories start here! We have created the perfect accessory to add excitement to your pool. Unlock your kids' imagination with a BADU SwimJet. Let them boogie board across the choppy waters to find hidden treasures, or angle the jets to send a current around your pool, letting them race the clock to wherever their childhood adventures take them.

- **Aquatic Therapy**

Recognized for thousands of years for its power to improve circulation, tone muscles and ease stiffness or joints, water has always been at the center of our lives. Our BADU SwimJet Systems provide a low-impact therapy for injury or fitness recovery. Unwind with a post-workout therapeutic massage, relaxing muscles, preventing lactic acid buildup, and speeding recovery time. See why over half of the professional football league uses our jets for rehabilitation.

BADU® SwimJet Systems

make small pools big and big pools better!

BaduJet super-sport //

For nearly 50 years, the German-engineered BaduJet super-sport has been the world's preferred counter-current swim machine. Today, we've put a new spin on an old classic by designing the BaduJet super-sport //. Control your swimjet directly from inside the pool, or via the all new **BADU Connect App**.

The BaduJet super-sport // gives you the power and control you want from a swimjet system. Everything is right at your fingertips. Swim, play, exercise, relax — the benefits of the BaduJet super-sport // are enjoyed by all ages.

BaduJet Imperial

Made of high-quality stainless steel, the BaduJet Imperial swimjet system offers a sleek and flawless design. This elegant swimjet adds style and functionality to any new pool. The BaduJet Imperial has two adjustable swivel jet nozzles, allowing you to tailor its flow rate to your specific needs. You control the degree of workout you want — building body, mind and spirit. And when you're done with your aqua therapy, relax with a pulsating, invigorating massage by attaching the massage hose to the jet nozzle. Relaxation and wellness has never been easier!

BaduStream //

With a BaduStream // SwimJet System there is something for everyone. This versatile swimjet system is available in several different packages to satisfy a variety of exercise styles and budgets.

The BaduStream // can be configured with one, two, or three jets. Its compact low profile swimjets fit flush against your pool wall, for minimum visibility.

BaduJet Inspiration

The BaduJet Inspiration is perfect for existing in-ground pools as well as new installations and even above ground pools. The system features dual jets for optimal swim against the current action, no-impact aquatic exercise, water massage and fun for the entire family.

BaduStream // Package A

BaduStream // Package B

BaduStream // Package D

NOTE: Over 90% of swimjets installed worldwide are BADU SwimJet Systems and are more than sufficient for the average pool owner's needs. Advanced swimmers are trained to "knife through and swim on top of the water," this type of swimming is used for high speed and is not ideal for use with our swimjet systems. Swimjet systems are designed with the recreational swimmer in mind and the swimming exercise obtained is more of a "jog" than a sprint. Call us if you have any questions 800-223-8538.

The BADU®Connect app gives you a convenient way to manage your BADU SwimJet System and Pool Equipment.

Builder Specifications

- BADU SwimJet Systems require a clear **unobstructed** area within the swimming pool that is 8 ft wide x 15 ft long x 3 ft deep to work effectively. This “swimming envelope” allows enough length for a swimmer to comfortably drift back and swim against the stream.
- All swimjets should be installed within 30 feet of the pump with 4” pipe and minimal fittings for optimum performance. If distance to the pump is more than 30 feet, 6” pipe should be used for the entire length of plumbing. Contact Speck Pumps for installations over 30 feet.
- DO NOT locate the swimjet housing in seating areas or on the back rests for such seating areas.
- The center of the jet nozzle(s) should be installed 12” below the water level. If the swimjet is installed either too shallow or too deep, performance will be lost.

Note: All BADU SwimJet Systems are provided with installation instructions for various pool construction types: new and existing gunite or concrete pools, pools with liners, and fiberglass pools.

Choosing a Location for Your BADU SwimJet

To ensure that there is a clear unobstructed swim lane, it is key to position the swimjets away from surroundings walls, benches, stairs, etc. The installed swimjet should be at least 15 feet (inside the pool) from an adjacent wall or obstruction and at least 8 feet (inside the pool) from an opposing wall or obstruction.

- IDEAL LOCATIONS*
- ALTERNATIVE LOCATIONS*
- UNFAVORABLE LOCATIONS

Here are a few examples:

Reminder: BADU SwimJet Systems require a clear **unobstructed area within the swimming pool that is 8 feet wide x 15 feet long x 3 feet deep to work effectively. This “swimming envelope” allows enough length for a swimmer to comfortably drift back and swim against stream.*
