

It sure feels good
to swim

Naked 

Freshwater Pool Systems

A modern backyard pool area at dusk. The pool is rectangular and filled with clear blue water. To the left of the pool is a concrete deck with a wooden slat privacy screen and a built-in wooden bench with blue and white cushions. To the right is a wooden deck with two white wicker lounge chairs with colorful cushions. In the background, there is a white wall with a dark rectangular feature. To the right, a brick fireplace is visible under a covered patio with recessed lighting. The sky is a mix of orange, pink, and blue.

"We're all about fresh water,
pure and simple.

Make the healthier choice
and turn your own backyard
into a Freshwater Oasis."

Naked Water - swimming as nature intended™

With the world's best quality water on tap, Australians appreciate the benefits of fresh water. Yet when it comes to our nation's favourite pastime, we've all accepted that chlorine and saltwater were the natural order of things.

Not anymore.

A breakthrough system by Naked Pools can safely and effortlessly purify your pool water without need for adding chlorine, high salt or minerals.

The benefits are crystal clear

No red eyes or irritated skin

Perfect for asthmatics, psoriasis and eczema

Up to 50% saving on running costs

Longer lasting equipment and pool surrounds

No need to wash swimwear or shower after swimming

Easy to set up and manage

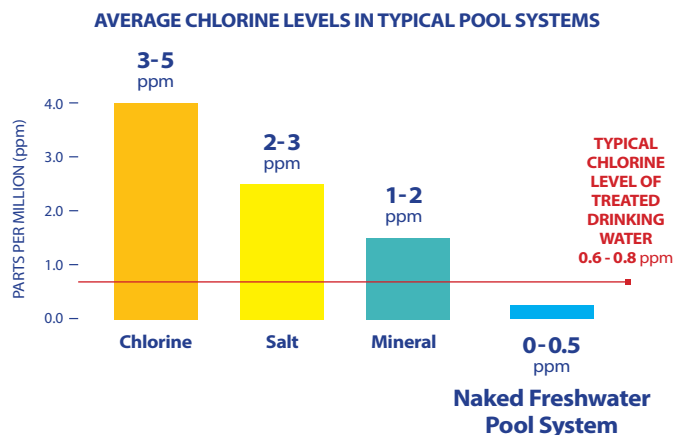

Recycle the water direct to your garden or holding tank

Taking into account one in three Australians have some kind of skin condition, or suffer from asthma, Freshwater systems have become increasingly popular as consumers are understanding there are better alternatives to chlorine, salt or mineral based chlorinators.

Asthma & Allergies

If eczema, dermatitis, itchy skin, asthma or skin rashes are a problem at your home, contact us to discuss a fresh water alternative that is making a huge impact in the industry. We invite you to explore the difference you can make to your swimming experience and take the first steps to a healthier lifestyle for your family and friends.

Less chlorine than tap water

Australia has some of the best quality tap water in the world. Although our water comes from natural resources, catchments and mountains, it still requires filtration and additives to ensure it remains fresh and bacteria free when used at home.

We all know that chlorine is one of the main additives in our domestic water. In nearly all cases, the amount is so small that you are not able to smell or taste it. The same applies for a Naked Pool.

"Having young children,
I no longer need to worry
about eczema flare ups
or the smell of chlorine
on their skin and hair."

Rejuvenating & Refreshing

Different to traditional pool and spa systems that rely on high levels of chlorine to sanitise the pool water, the Naked System utilises nature's natural minerals such as copper and silver.

Algae cannot grow in a copper environment, while silver has purifying qualities, and these minerals remain in the pool to constantly sanitise your water.

With extremely low amounts of salt and the minerals present, the water in a Naked Pool has a soft and rejuvenating feel, best described as swimming in a fresh water stream.

And there is no need to shower or rinse your swimwear after use!

What is ionisation?

Copper and silver ionisation was first used by the Greeks, Romans and ancient Egyptians, and has been successfully used in swimming pools for over 50 years. NASA even use ionisation for their drinking water in space. The Naked NKD-R System uniquely combines ionisation with a powerful built-in oxidiser, keeping your pool crystal clear.

And unlike traditional pool sanitisers, your residual sanitiser is simply copper and silver, rather than chlorine and other chemicals, a natural solution that leaves you feeling refreshed and rejuvenated after swimming.

Environmental Benefits

Save up to 50% on running costs.

The Naked Pools System is customised to the needs of your swimming pool. This reduces running time and power consumption and increases the longevity of your pool.

Recycle the pool water without dilution.

Subject to local council regulations, you can re-use the water from your pool directly onto your garden or into holding tanks as grey water. Not only does this save water, there are no hazardous chemicals going down the public drainage systems.

All pool equipment will last longer.

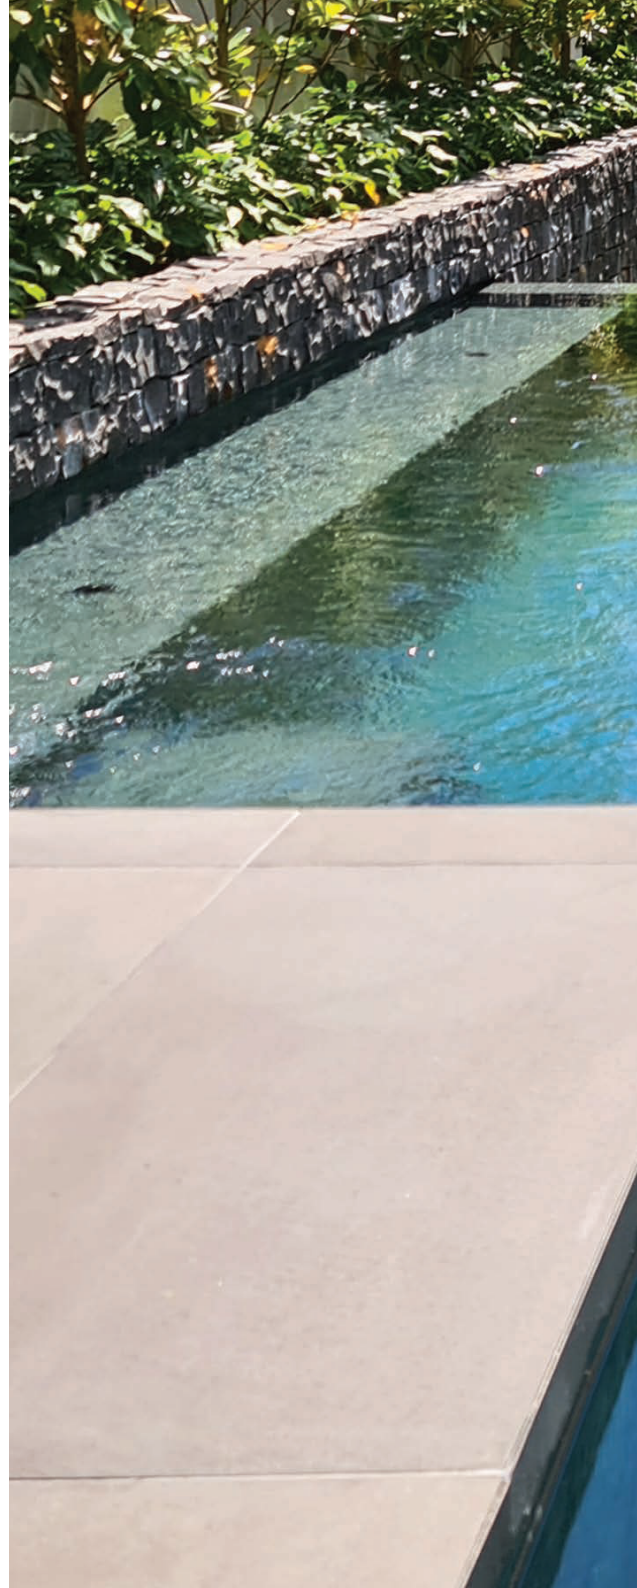

Without the harsh chemicals found in chlorine and salt chlorinated swimming pools, your pool filters, pipes, tiles and other surrounds will last much longer. Again, saving you money and the need to replace products such as plastic or glass from around your pool.

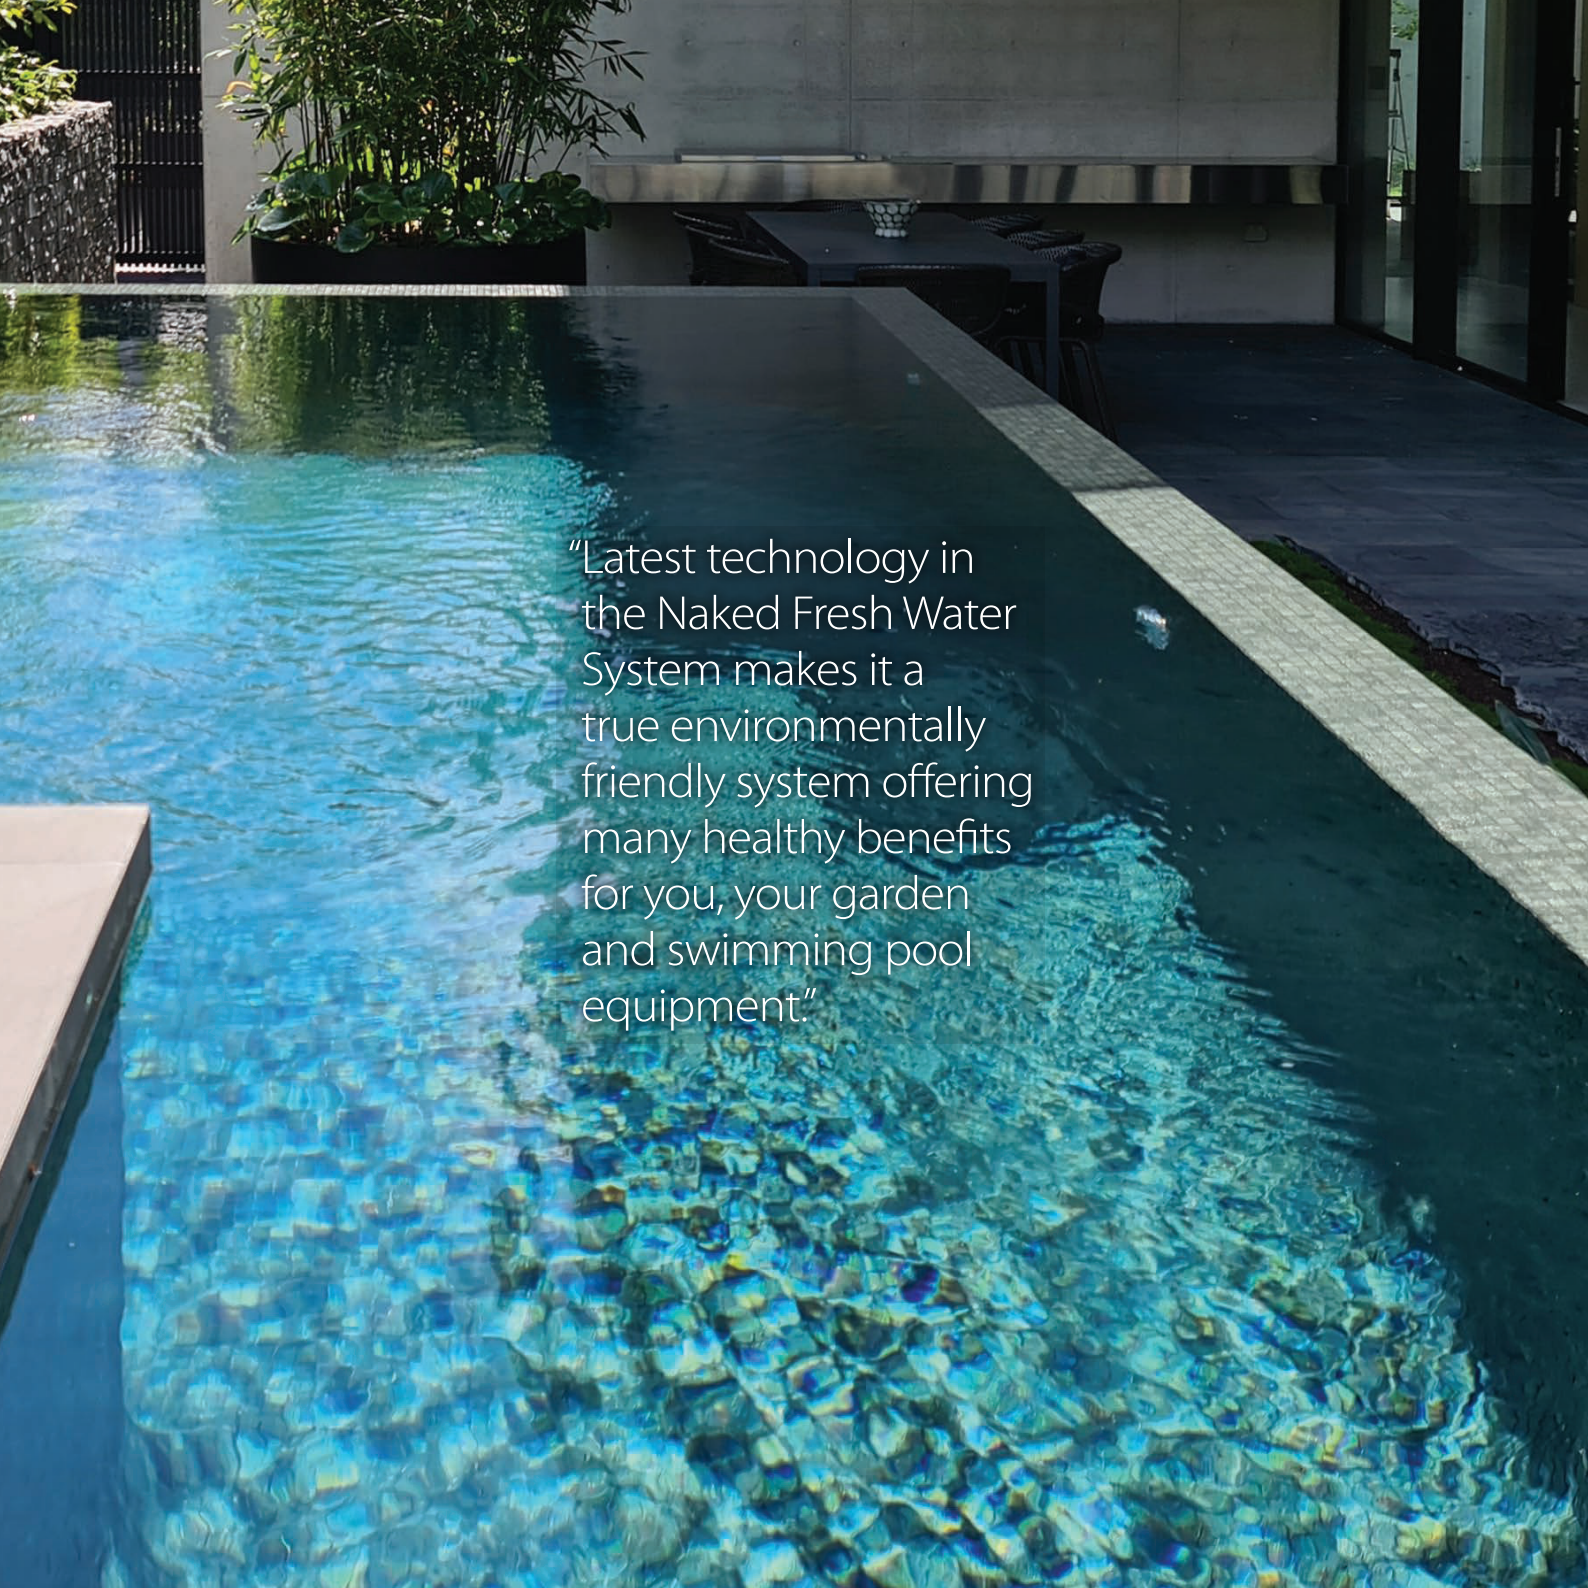

Your swimwear will last longer.

Your clothes won't deteriorate like they do when swimming in chlorine or salt pools. In fact, the water is just like having a shower, therefore you do not need to rinse your bathers or yourself after swimming.

Reduction in chemical usage.

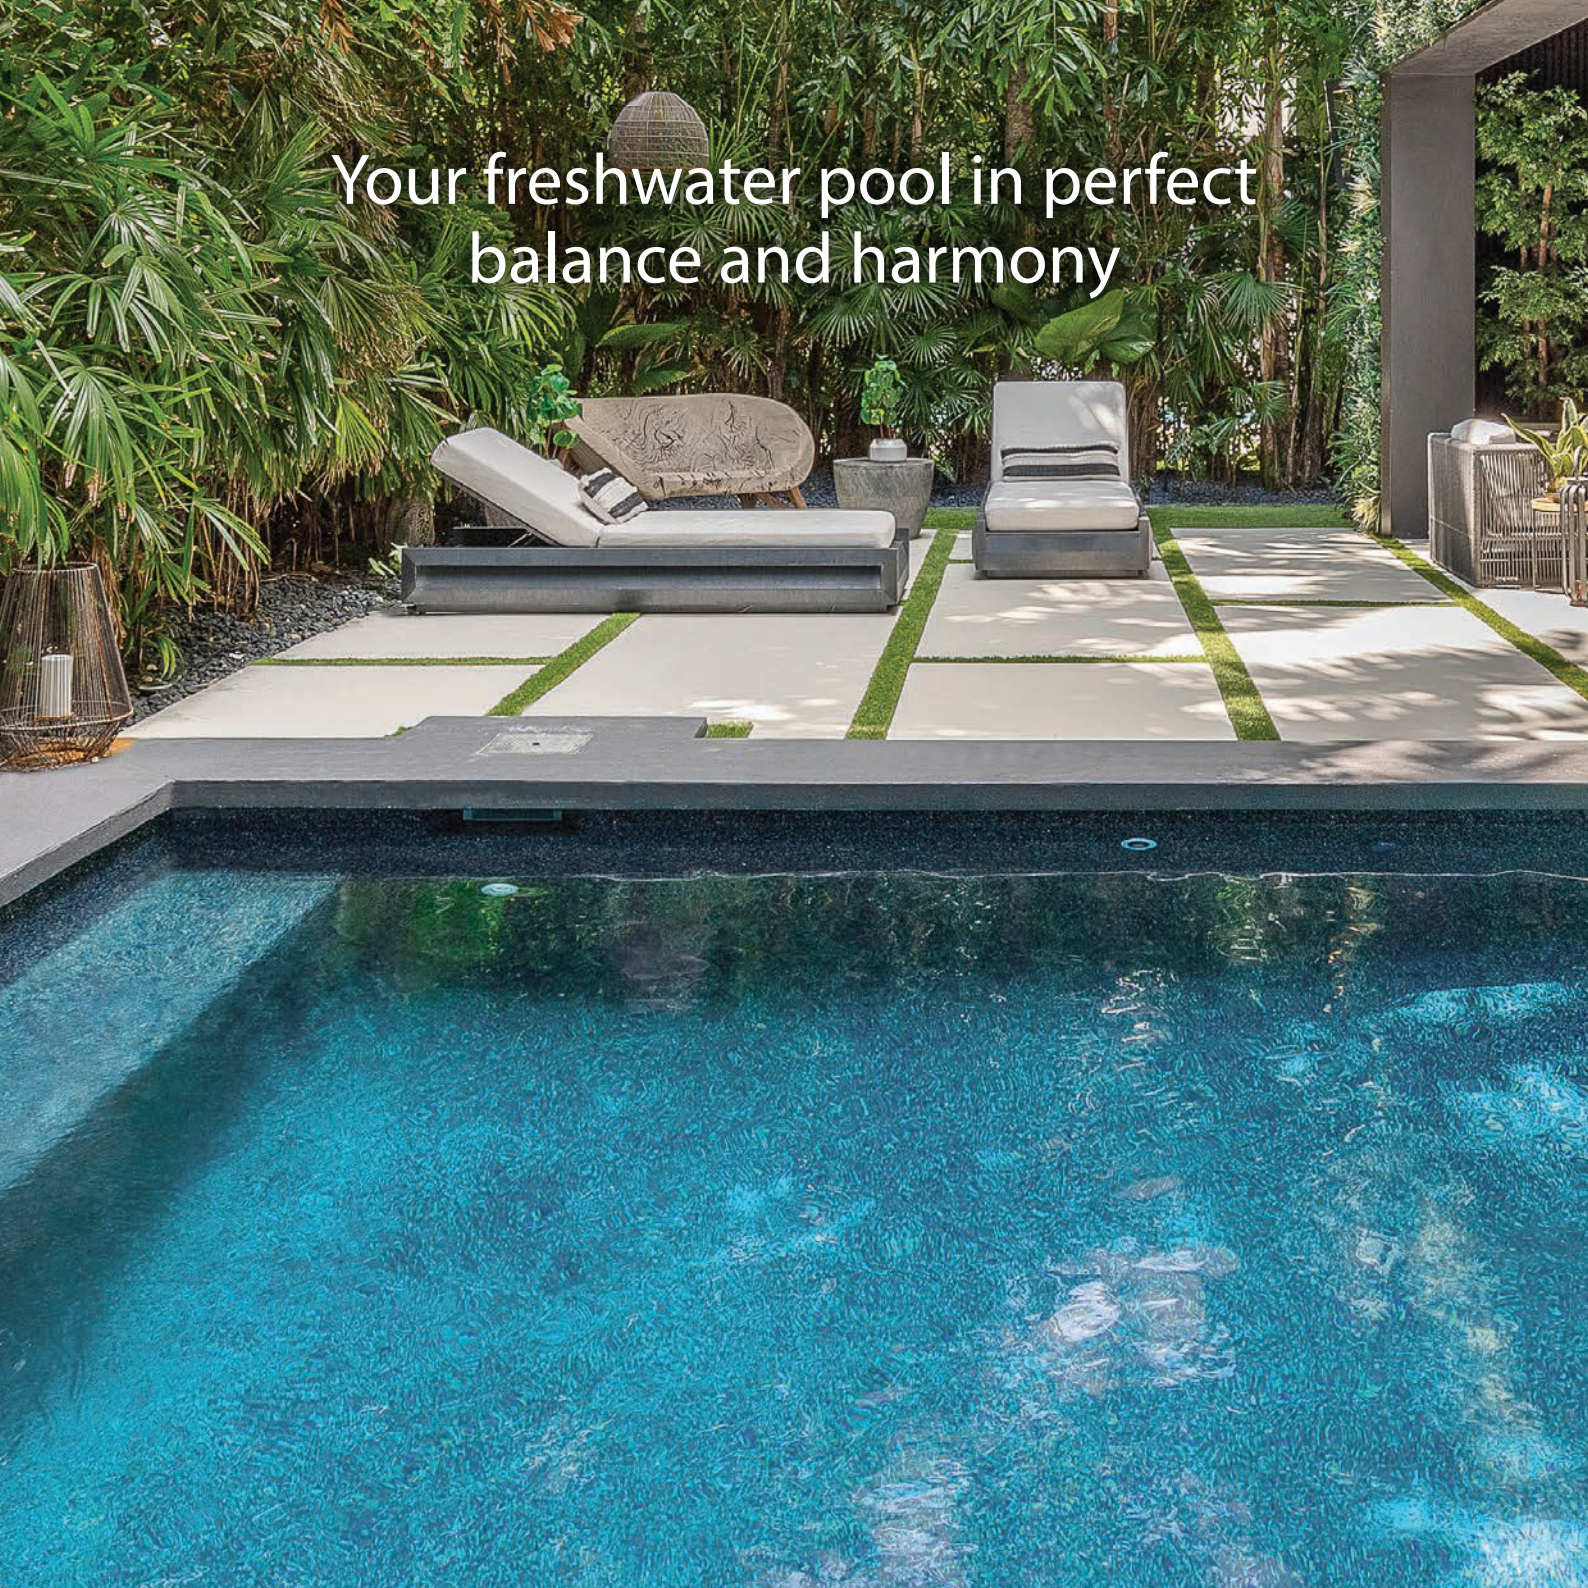

You do not need to add other chemicals such as stabiliser or blackout to maintain chlorine levels in your pool like traditional systems. This makes your pool better for your health and the environment.

A photograph of a modern outdoor swimming pool. The pool has a tiled bottom with a mosaic pattern of blue, green, and yellow tiles. The water is clear and blue. In the background, there is a patio area with a dark table and chairs, and a large potted plant with green foliage. The pool is bordered by a light-colored stone or concrete edge.

"Latest technology in
the Naked Fresh Water
System makes it a
true environmentally
friendly system offering
many healthy benefits
for you, your garden
and swimming pool
equipment."

Your freshwater pool in perfect
balance and harmony

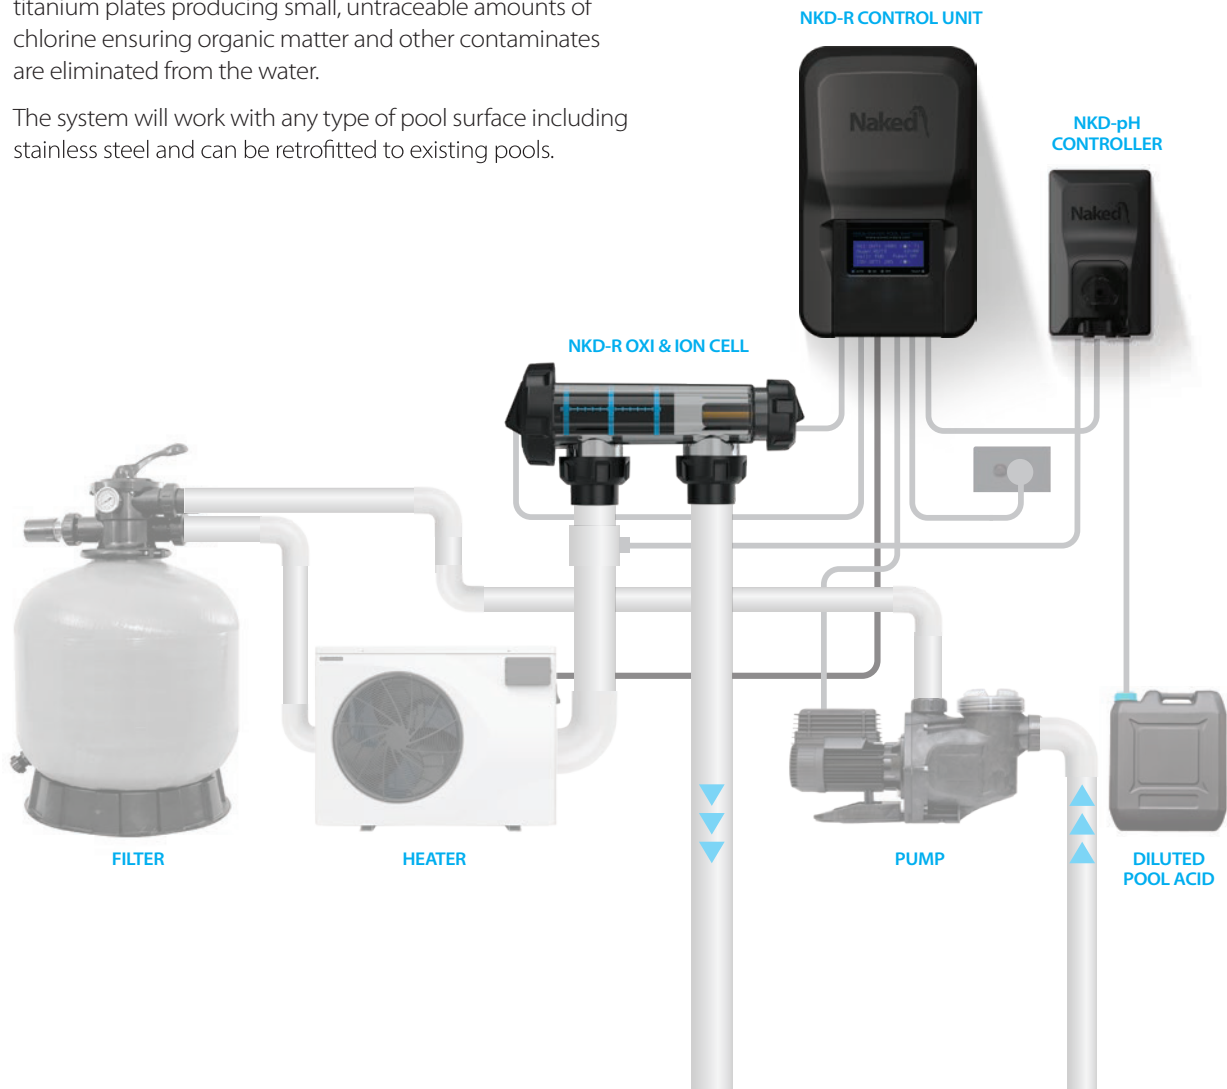

The Naked Freshwater System

The Naked Hybrid System is made up of a digital control unit which supplies and manages current to the electrode assembly (OXI & ION Cell). Electrolysis passes through the copper and silver anodes, releasing the ions into the water. The silver purifies the water and the copper prevents algae growth.

In addition, oxidation is used as water passes over the titanium plates producing small, untraceable amounts of chlorine ensuring organic matter and other contaminants are eliminated from the water.

The system will work with any type of pool surface including stainless steel and can be retrofitted to existing pools.

NKD-R

The NKD-R is designed for medium to large pools.

NKD-M

The NKD-M Naked Freshwater System for small pools and swim spas.

NKD-pH Controller

The perfect compliment to your Naked Freshwater System.

NKD-R

The Naked NKD-R system can safely and effortlessly purify your pool water without need for adding chlorine, high salt or minerals.

Designed from the ground up, the hybrid system combines ionisation and oxidisation delivering you crystal clear water without that chlorine smell, feel or taste. Ideal for medium to large swimming pools, a single NKD-R System can manage water volumes up to 150,000 litres.

NKD-M

Enjoy all the big benefits of Australia's favourite and most awarded NKD-R Freshwater System in a MINI. The NKD-M is tailored for pools and swim spas up to 30,000 litres. The MINI is fully compatible with the Naked pH Controller and like all products it comes with our Complete Customer Care Plan.

NKD-pH Controller

Plug the NKD-pH Controller into the Naked System and it is automatically configured to help manage the pH balance of your pool water on a daily basis.

The addition of semi-automatic dosing further helps control water balance making pool maintenance even simpler while saving you time and money with less visits to the pool shop.

Fresh thinking

Every Naked Freshwater System includes our Complete Customer Care Plan, to ensure the system and the pool is everything it should be.

Once your system is installed, simply download the Naked Pools App and register the details with us. We will provide you with regular support and information to ensure your Naked Freshwater System always provides you with the ultimate swimming experience.

Australia's most awarded pool sanitiser

Recognised by our national industry body SPASA, the NKD-R System is the most awarded pool sanitisation system for 2020 and 2021 including multiple gold awards for New Product, Sustainable Product and Product of the Year in Australia and New Zealand.

"Designed in Australia, this product is energy and cost efficient compared to conventional systems. It's the perfect option for environmentally conscious customers, people with health conditions, sensitivities or allergies, and swimmers preferring a freshwater experience."

- Good Design Awards 2021.

"Why doesn't everyone have one of these!"

The number one feedback we hear from our customers.
